Dr. Bill Thornton  
Astronaut Office  
LBJ Space Center  
Houston, TX 77058

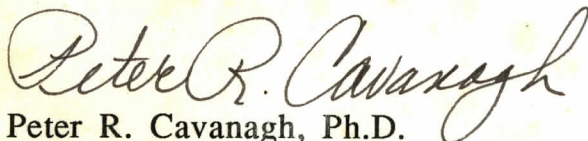

Dear Dr Thornton:

I am enclosing the draft copy of our final report on the shuttle treadmill kinematics project. As you will see indicated in the text, there are one or two places where we need some more information. We would also be glad to receive your comments on the report - particularly if there are errors that we have missed.

The preferred "press date" with the final copy is Wednesday October 7 so that you may have a week to read it over, unless you need the final copy by an earlier deadline - which can easily be arranged. If this is the case, please call me at your convenience with any comments you may have. Otherwise a response by letter would be fine.

I look forward to your comments.

Sincerely,

Peter R. Cavanagh, Ph.D.  
Professor and Director
