TO: BG/Helton Crawford
FROM: SD/W. E. Thornton, M.D.
SUBJECT: Technical Evaluation of S.N.-9-BG41-93-9-06P

The technical proposal dated July 24, 1989, from Whitmore Enterprises in response to the RFP referenced above has been thoroughly reviewed. Dr. Harris is not available for a joint review but it meets his prior stated requirements and meets both intent and specifications for all of the requested deliverable items including test and certification items previously identified and agreed upon with Mr. Halloway and others from SR&QA. This is an ambitious program in terms of low cost and rapid delivery but based on this contractor's previous performance there is every reason to expect the goals to be met. In terms of usual contractor costs, the prices are very low but consistent with his usual pricing.

Do not hesitate to contact me for any additional information.

William E. Thornton, M.D.
