Dr. James G. Gaume
Chief
Space Medicine
The Martin Company
Denver 1, Colorado

Dear Dr. Gaume:

Thank you for your letter of March 6, 1959.

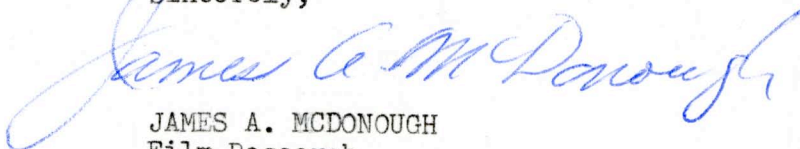

The material you sent was of great assistance and is a highly imaginative piece of work that lends itself to creative thinking in our project here at CBS very nicely. We are most interested in all the aspects of your project as it progresses and should like to be informed as soon as the proposals to interested government agencies are cleared away.

Of particular interest to us at this time, so that we might make plans for possible shooting ideas, are:

- 1) Photographic stills on the lunar housing simulator. Since this was completed about March 1 we would appreciate any photographic stills or black and white sketches of the simulator.
- 2) In the booklet "Around the Moon in Eighty Days" there was an 8 X 10 art black and white picture of a lunar vessel orbiting the surface of the moon and although this is perfectly adequate for your booklet we feel it lacks something for photography. Is there better art work on this sketch?

In view of our continuing interest can you send us the photographs and black and white sketches or art work as soon as possible (after you are permitted) so that we may plan our project with more definition.

Sincerely,

JAMES A. MCDONOUGH
