SUBJ: Crew Report

Enclosed is a memo from Joe Kerwin on crew report format which is probably a good starting point but which can and should be modified to our needs. Let's try to get a rough cut at least of major topics by June 6, when we will meet at ARC and then proceed from that point.

There are obvious differences between us, and I should like to preserve these differing points of view in contrast to the usual NASA "unanimity." My only request is that they be as objective as possible and truly believed rather than, say attempts to curry personal favor by agreeing with an established or cherished managerial position.

In the past some reports, if they were critical, were modified or even deleted but whatever its fate we should still produce the most honest objective report possible.

Many thanks for doing what seemed to me a fine job.
