FOLD

MESSAGE

FOLD.

Rowing machine - The support contractor for flight exercise hardware has a very successful record of following their own inclinations which appears to be the case here eg. tacit refusal to put the machine in the gym. In the same way they have decided the unit wants modification and without some objective person familiar with both rowing and this machine present during the test, there is little likelihood that the group will change its mind test guidelines or no. It is also my opinion that it should be someone from this office, and further that to have any type of getting hardware you want for your flight, you will have to become very actively involved for while the support contractor was given money and directions to procure an available flight unit in 1990 this has also been superseded by the contractor's inclination to do otherwise.
