Dear Dr. Prud'homme:

Apropos your FAX of November 28, 1988, I have enclosed a suggested presentation title with its abstract. It is an original work at NASA and may complement the papers being presented by Berthoz and others. Conversely should it be desirable to present work from a different area, I could offer original work in either the Musculo-Skeletal or Cardiovascular systems, past and current.

Thank you for this opportunity.

Sincerely,

William E. Thornton, MD
NASA Astronaut

To - Roger Prud'homme, etc

Dear Dr. Prud'homme

Apropos your FAX of 28 Nov. 1988
I have enclosed a ^{presentation title} suggested paper
with its abstract. ~~This is w.~~ It is
original
on a work ~~done by me~~ at NASA and
papers being presented
may complement the work of ~~St~~ by
Berthoz and others. Conversely should
you it be desirable to present work
from
a different area, I could
offer ^{original} ^{either} ^{stet} present work in the Musculo-
Skeletal or Cardiovascular
systems, ~~both~~ past and
current -

Thank you for this opportunity

Organization : Centre National de la Recherche Scientifique (CNRS) and Technospace
(Bordeaux, France, 8-9 December 1988).

Dear Mr Thornton,

I have been given your name by Erick DAVIAUD, a Technospace member.

The enclosed note gives the main topics of this forthcoming Conference.

It has been the view of the Conference Committee that your present research would be valuable to this meeting. It is therefore my pleasure, on behalf of the Centre National de la Recherche Scientifique, to invite you to give one of the Conference lectures.

We would require a title and one page abstract of the main ideas and results you would speak about.

Looking forward to seeing you with us in December 1988,

Yours Sincerely,

Roger PRUD'HOMME.-

Member of the Conference Committee
