Apropos our discussion: ~~the following~~
~~seem~~ ~~seem~~ worth consideration.

~~to~~ Absolutely agree that if Life Sciences ^(L.S.) are going
to do hardware their way it ~~be~~ ^{be} entirely their
way.

~~B. Brandenstein~~ Conversely ^{my} this last year's effort has
produced both knowledge and hardware
and if I simply walk away from it
without preparing the leaving reports
of work and descriptions of hardware
purchased they could claim wasted effort & some
justification or even worse. ^{generating new designs.} This does not include:
There are three such areas:

1. Studies and projects of prototypes,
test set-ups & experiments largely at
the lab I established at A&M Mac Dac.

2. ~~Reports on~~ Reports to and participation in
an exercise symposium to be held
here in Oct. I have in hand at the
request ^{the making of a} catalog & description of available
flight exercise hardware and, a report on
Skylab & Shuttle exercise experience. There
and a 'show & tell' session of hardware
I have developed.

3. A ^{technical} description & test plans of hardware
produced by my efforts (there are 3
flight items).

~~22~~ Follow-up on correcting many discrepancies in the existing ^{flight} T.M. flight program ~~which~~ is underway.

As to A.G. they are pressing, and before our discussion I had agreed to give them 'specifications' on ~~the~~ my design of for an EDO ^{which they would build.} treadmill. ~~They~~ this does not now seem appropriate.

The reports will
On item 2, which would take weeks, it would seem appropriate to continue ^{this} 5 active involvement in their program.

^{PSIS}
T.M. The ~~treadmill~~ Follow up of the Current Shuttle Item 3 ~~also~~ is not inconsistent a usual astronaut ~~but~~ office duties -

, Pool, Brown & D. daily
I had agreed to a ~~day~~ by schedule & the above will affect this so please comment ASAP. Above all get me ~~outta~~ here. ~~When~~ please expedite my return ~~reassign~~ return i.e. don't let any of the above interfere.

I remain ~~willow~~ anxious to help the program any way possible but the current arrangement is counter productive -
