Thornton

OPTIONAL FORM NO. 10
MAY 1962 EDITION
GSA FPMR (41 CFR) 101-11.6

UNITED STATES GOVERNMENT

Memorandum

TO : All T-38 Pilots

DATE: October 8, 1969

FROM : CC/Chief, Aircraft Operations Office

SUBJECT: T-38 Checklists

The T-38 dash-one, and accompanying checklist, that we are presently using is dated 1 April 1969 with a Change 1 dated 1 July 1969. This is the Air Force dash-one/checklist and does not include the NASA supplement. We will not use the NASA supplement until we establish new procedures for use of the duct anti-ice system; however, we will keep the NASA supplement in the current dash-one. The NASA checklist will be discarded.

There are several differences in normal procedures in the new publications and two new emergency procedures (hydraulic systems malfunctions and stability augments malfunction).

Anyone who desires to maintain their personal dash-one, please call Aircraft Operations and have your name put on the mailing list for T-38 and/or T-33 dash-one changes. Contact Ed Rainey or the Duty Officer, extension 7256, to get on the list.
