MESSAGE

FOLD.

Apropos verbal agreements between SD and CB, I went to MDC this AM to teach their personnell how to use the above system. On ~~inventory~~ inventory most of the components including two PC computers, plotters and 4-5 ambulatory recording^{ers}, plus all accelerometers, calibration and support equipment was missing. If possible this should be recovered for it is ^{still} a one of a kind system of great value to NASA projects. With MDC's approval I retrieved a box of missing records and will file it c other records of the project. If the missing components are found I remain cc. M^cCauley, MDC. ~~page~~ eager to see this restored.
