REPLY TO  
ATTN OF: DB5/71-101

NOV 3 1971

MEMORANDUM

TO: EC4/Head, Test Support Section  
Attention: Dr. La Pinta

FROM: DB5/Chief, Toxicology Laboratory

SUBJECT: Postflight Toxicology Requirements

It is requested that the following addition be made to the Apollo 16 postflight requirements. [The urine and fecal samples collected from the crewmembers during the first 24 hours postflight <sup>sample</sup> be analyzed for nickel content. These analyses will be an extension of those previously performed, but will not require sampling above and beyond those already scheduled.

Elliott S. Harris, Ph.D.
