Astronaut Gym Ergometers

A number of astronauts have become addicted to the bicycle ergometers. Unfortunately, the units in the gym are worn out and apparently are beyond the abilities of the locals as regards repair. None of the units work, and I recommend they be removed and replaced by two units. One is a time tested mechanical unit that runs forever and the second is a good, popular constant load unit, e.g.

1 ea. Quinton Monark Model 850 0-2100 Kgm/min	- \$435.00
1 ea. Schwinn EX-1 Ergometric Exerciser	- \$595.00
(both are complete, delivered prices)	

The sole local source is Ross Trading Company; Bellaire, TX; phone number is 621-8245.

Also, I suggest we replace the missing weights and if you can get some petty cash, I will get the handles of the ones left chromed as they should be.
