Mr. Theodore D. Benjamin
Regents Educational Television Project
220 East 42d Street
New York 17, New York

Dear Mr. Benjamin

Your request for a presentation on "space medicine" is in complete accord with the Air Force policy of keeping people informed of our mission and the various programs in which we are engaged. The relatively new and vital field of aerospace medicine is most appropriate in a project such as yours. This, or any field of science, can only continue to advance as new people are interested in it and contribute to it.

We would consider it a privilege to bring a television presentation on aerospace medicine to the students of the New York City Metropolitan Area. A panel type presentation is being contemplated, and two outstanding flight surgeons from the Aerospace Medicine Division will be available to make the presentation. They would bring the appropriate materials with them. I have asked Major Charles A. Berry, USAF, MC, of the Aerospace Medicine Division to serve as a point of contact for determining the scope of the program and working out the necessary details. Please contact him concerning the time of the program, etc.

My best wishes for success in your educational television programs.

Sincerely

JOHN K. CULLEN
Major General, USAF, MC
Deputy Surgeon General
