Dr. Gaume Named To AMA Committee

Dr. James G. Gaume, Chief of Martin's Space Medicine Section in Denver, last month accepted an invitation to serve with the Life Sciences Committee, a new group that will function as part of the Aerospace Medical Association.

According to Dr. J. N. Waggoner, Medical director of The Garrett Corporation and chairman of the Life Sciences Committee, specific work areas will be spelled out to members later this month. "The committee will serve a very important and vital function of benefit to all," Waggoner said in his invitation to Gaume.

Dr. Gaume is also an active consultant of the Human Factors and Bioastronautics Committee of the National Rocket Society. A complete description of the function and purpose of the new AMA committee is given in the July issue of the Aerospace Medical Journal.

Do You Still Have Out-State Drivers' Or Auto Licenses?

Information concerning automobile registration and driver's licenses as it affects temporarily and permanently assigned employees of The Martin Company in Colorado is available in the Employee Relations Department.

The company, in cooperation with the Motor Vehicle Department, has provided instructions and procedures governing those who still have out-state auto and drivers licenses. Employees in this category should phone Dave Lawry, Personnel Coordinations, CH. 4-2471, extension 1080, Keith Building, for the specific regulations that apply.

ics, Customer Services, and Finance. Prior to moving to Denver last year he worked on the DynaSoar Project in Baltimore. He transferred in May from Denver's Finance Division to his present position in the Administration Division.

Bullock, who is responsible

'A Tribute'

Among the foothills of the Rockies
And the red rock canyons grand
We have the birthplace of the TITAN
A defender of our land.

From a dream to reality
In three short years it came
The many critics stated
That the efforts were in vain.

It took work and sweat and worry
On the part of every man
To bring it from the drawing board
To Florida's capes of sand.

There it stands, a thing of beauty
With its stages tall and sleek
Its nose cone pointed skyward
Has a mission to complete.

Just to see it starting skyward
From Florida's cape of sand
Would surely give sensation
To the heart of any man.

There are songs about our railroads
And our mighty ships so grand
But we're all toiling for our TITAN
A defender of our land.

Lithicum started as a factory clerk at Baltimore in 1940. Areas of responsibility since then included expediting and scheduling in the areas of manufacturing and procurement. He transferred into his present responsibilities with the Materiel Division in July, 1958.

Goodwyn Returns After Year Leave Serving ARPA

J. C. Goodwyn returned last month to the Denver Division after serving the past year with the Institute of Defense Analysis, Washington, D. C., in an advisory capacity. During his one year leave of absence from Martin he was assigned to the Advanced Research Projects Agency division of IDA at the Pentagon.

Goodwyn, who served as Systems Analysis Chief in Engineering prior to taking the assignment, has been assigned as Manager of the Advanced Planning Department, Plans and Programs Division.

Coin & Stamp Clubs

Interested Martin employees and members of their families are invited to attend Martin Stamp and Coin club meetings and activities.

The Coin Club meets every

stockholders and dividend payments if they have been successful.

Working with each company are three adult advisors from a counseling firm, such as Martin. One advisor works with the group on production; one in sales; and one in accounting; to help these teenage tycoons unravel the knottier problems of business.

Participation in Junior Achievement is valuable training for these young people in business fundamentals. It also offers tremendous challenge and an excellent opportunity in leadership training for the adult advisers. These companies meet at the Junior Achievement Center, 425 Lincoln Street, one evening a week for a period of 2 hours from October until May.

Any Martin employee wishing to participate as an advisor or desiring further information should contact Herbert Wolff, Manager of Community Relations. Representing The Martin Company as a director on the Junior Achievement of Metropolitan Denver Board this year is J. P. Healey, manager in Quality Control.

first and third Tuesday of the month at 7:30 p.m. in the Fort Logan cafeteria. The Stamp Club meets the first Wednesday of each month at the Fort Logan cafeteria at 7:30 p.m.

Highlights of both meeting programs are the sale, trade and swap sessions.

The Missile is published twice monthly as a service to employees of The Martin Company, Denver Division and their families, to keep them informed about the company, its policies, products and personnel. Published by Information Services, The Martin Company, Box 179, Denver 1, Colorado.
