SUBJECT: Scientific Exhibit—Poster Presentation
Copy: B. Del Mar, B. Tice, S. Cawley, Exhibit File

NO.: VRM-034-81

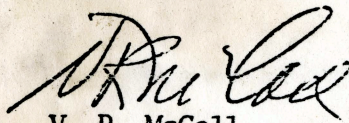

DATE: March 12, 1981

Dr. John Wallace, University of Texas Medical Branch, Galveston, Texas, has received an acceptance for a poster presentation at the "National Conference on High Blood Pressure Control." This conference will be held at the New York Hilton May 3 through May 5.

The poster must be 72" high and 60" wide. Dr. Wallace was requested to provide information on where we can cut the existing scientific exhibit panels for use. The display is to consist of "Objective—Methods—Results." Graphics are to be limited to those applicable to "slides" for use in talk.

I propose we remove existing panels from exhibit and have them separated into usable sections so that they can be later reassembled. If this is feasible, a minimum number of man-hours will be required.

- Action:
1. Review exhibit for section selection.
 2. Make up appropriate sections.
 3. Confer with Dr. Wallace and Dr. Thornton regarding display material to fit allocated space.

V. R. McCall
