

Del Mar Engineering Laboratories

TO: F. H. McCollum

NO.: EL-102

FROM: R. E. Murray

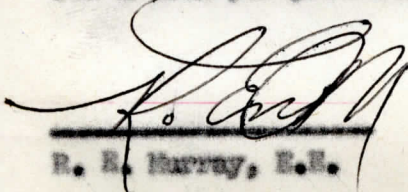

DATE: October 7, 1957

SUBJECT: Handbook Operational Service Instructions, D-100A Prototype

Block diagram of Scorer is enclosed at rear of manual. Schematic diagrams of individual black boxes have been removed from manual but are available if you require same.

Sales should apply information listed in order of importance, Sections 3.1 through 3.19, Sections 1.15 through 1.18, Section 2 all and Section 3.22 through 3.25 for proper operation of Scorer by non-technical operational personnel.

Suggest sales have field men undergo technical instruction and operation of our electronic products here at Del Mar. Estimated time for such instruction would run 1 week per product.

R. E. Murray, R.E.
