Major Charles A. Berry  
U.S. Air Force  
Aerospace Medicine Division  
Washington, D.C.

Dear Major Berry:

In line with our telephone conversation of last week, I am enclosing a bulletin on the New York State Educational TV programs. Your attention is called to page 18 and the plan for the January 3 program on Space Medicine. Of course, the format and content of the program is quite flexible and will depend in great measure on your wishes. In the past I have found that the guest-host relationship seems to work fairly well. My specific area of competence is physics. I do most of the physics programs unassisted. I play the role of the intelligent layman in those relating to biology. I think that an interplay such as this might be indicated on this program.

As we last left it, you will get in touch with me so that we may arrange a meeting to go over the preliminary details of what I know will be one of our most interesting programs. Incidentally, our programs are kinescoped and the films are made available to school systems throughout the country.

I may be contacted at the Project address above or at my home, 48 Marshall Road, Yonkers, N.Y. (Yonkers 3-8760).

Let me thank you once again for your cooperation.

Yours truly,

*Theo. D. Benjamin*
