

Biweekly Activity Report
Space Station (Dave Walker, Chief)

Norm - give me
a yell for anything
further on this
WT, 1430

General (D. Walker, N. Thagard)

- Walker briefed Puddy on SS status

EVA (W. Spring)

- Truly/Stofan memo on commonality has been released
- Supported cupola orientation session and found mouse difficult to use
- Staged decompression for S.S. EVA is now being considered
- Supported fact finding missions for TRW space station servicing contract and MDAC EVA effort
- Request from Whitsett to increase EVA guidelines from 24 to 36 hours

Manned Systems (W. Fisher, S. Lucid, W. Thornton)

- Fisher attended CSR of ⁹SS Man(ned) Systems
- Thornton had meetings with and briefings of Life Sciences new chief of exercise programs
- Lucid attended DMS SCR and USE WG and participated in an SES cupola work station evaluation
- Attended review of interface standard document and made a number of inputs to anthropometric and exercise sessions. Unlike previous inputs these were accepted

Command & Control (S. Musgrave)

- FTS quarterly meeting cancelled
- Supported CSR and found MDAC's octagonal cupola has not been evaluated by JSC

Operations (D. Griggs)

- There is reason for concern over some ideas put forward by Dr. B. J. Bluth on crew psychological factors in S. S. Ops
- CERV WG continues to study Design Reference Mission
- TRW OMV manager has set tentative date for start of ^{ever}~~6 mos~~ 6 mos time sims which will include malfs
