Gentlemen:

Del Mar Avionics is pleased to offer to be the publisher and to provide the publication facilities, artwork makeup, binding and production on a one-time basis for a cornerstone informal publication on Ambulatory Long-Term Blood Pressure Monitoring to report initial results and assessments of future opportunities utilizing ambulatory blood pressure monitoring around the clock in the treatment of hypertension. You are to serve as joint Editors in Chief for this publication.

More specifically, the purpose of this publication will be to place before the medical profession working in the field of hypertension a series of very new papers by qualified hypertension research specialists, pointing out any significant initial results in assessment of patient hypertension and administering medication, diet, exercise or environment to reduce the condition through use of ambulatory blood pressure monitoring and to predict, based on these results, the probable future research opportunities, trends, and needs of this technique in clinical medicine.

I hope you will take this commitment from our company as your signal to solicit from current researchers in the field of hypertension who have had experience with this type of instrumentation, papers for publication which will be meaningful and helpful to the future participants in this activity and field

of medicine. Del Mar Avionics will hold this commitment open until January 31, 1980 at which time you should plan to present to us the drafts of the papers and rough artwork for this publication.

This Introduction to Long-Term Ambulatory Blood Pressure Monitoring will contain no advertising material. Its quality is to be guaranteed by the approval of all contents by the joint editors. We look forward to accomplishing a worthwhile result with expediency so that the publication can be printed and distributed free of charge at an early date when it will be most useful.

Very truly yours,

DEL MAR AVIONICS

  
Bruce Del Mar  
President
