Sole Source Justification for Procurement of Telemetry System from Gulton Industries

GPSM

1. All known major manufacturers of EEG telemetry equipment were queried as to availability of standard items. Of the manufacturers, only Gulton Industries is able to supply such an item with a delivery time of a few weeks. In addition only this manufacturer could supply a miniature single channel crystal controlled EEG telemetry system without requiring development effort. There are a number of manufacturers of EKG telemetry systems, but none were crystal controlled, single channel units that could be considered other than prototype or developmental items.

2. For these reasons it is requested that these units be procured at sole source from Gulton Industries who have promised a possible delivery as early as December 15. These items are required for an EEG study, and it cannot be started until this equipment is received. Mr. Fred Schwartz of Gulton Industries, Willow Grove, Pennsylvania, phone No. 215, OL 9-9110, is familiar with our requirements.

FOR THE COMMANDER

WILLIAM E. THORNTON, JR., Captain, MC, USAF  
Office of the Assistant Deputy for Bioastro/Aerospace Medicine
