February 18, 1986							
12	13	1A	89.7		6 + 1		
13	14	2A	163.7		10 + 2		semi liquid + liquid
14	15	3A	159.2		6 + 1		solid
15	16	4A	171.7		6 + 1		
16	17	5A	118.6		6 + 1		few dry flakes around paper frame

¹Wt. determined with Mettler Bal. # weighed and all material removed and cup wiped.
Sample Wt. = Initial Wt. - 65 gm (tare).

²Small, very thin, dry smear at center bottom.

³Small amount escaped bottom center during compaction, wet bottom of piston. Unless otherwise noted, samples frozen then thawed at room temp.

* Added 2° pad by reversing drive direction to remove pad and then replacing pad.
