CB - Informal Memorandum

TO: Ed Fein, Esq.

FROM: William Thornton, M.D.

SUBJECT: Review of Treadmill Patent Application

After several attempts to correct Description of the Prior Art, it was rewritten in its entirety. Several additions were made to the list of features.

As they stand the flow sheets are incomplete and since they confuse me in this situation, were not corrected. My recommendation is not to use them but if they are used extensive additional work is needed.

July 4, and Saturday, July 6, has been spent trying to correct something which is in concept simple. Not sure what the problem is but after two 'holidays' spent on it I haven't even gotten to the admittedly complex concepts of servo control of grade/speed. Will discuss it with you and would like to review my disclosure at that time.
