UNITED STATES GOVERNMENT

# Memorandum

TO : CB/T. P. Stafford

FROM : CF34/Chief, Flight Planning Branch

SUBJECT: Cue card locations

DATE: NOV 29 1969

In reply refer to:  
CF342-9M-268

Enclosed is a set of CSM & LM main display console (MDC) drawings showing recommended locations for cue cards. Full-size card formats for those areas are also enclosed. These areas have been measured in the spacecraft for optimum card size, shape and velcro location. Cutting dies for these shapes are being manufactured. By limiting MDC cue cards to these specific shapes and areas, much time and effort in the fabrication of these items can be saved. This will allow more rapid turn-around on cue cards and more time for verifying the technical accuracy of the cue card data.
