Ms. Erin L. Glynn
University of Texas, Medical Branch
301 University Boulevard
Galveston, TX 77555

Dear Ms. Glynn:

The American Physiological Society grants you permission to use the following *American Journal of Applied Physiology* article in your PhD thesis for Texas University Medical Branch:

Hans C. Dreyer, Erin L. Glynn, Heidi L. Lujan, Christopher S. Fry, Stephen E. DiCarlo, and Blake B. Rasmussen

Chronic paraplegia-induced muscle atrophy downregulates the mTOR/S6K1 signaling pathway

J Appl Physiol 104: 27-33, 2008. First published September 20, 2007;

doi:10.1152/jappphysiol.00736.2007

Copies of your thesis may be produced and sold on demand by ProQuest/UMI, but free internet downloads of the *J Appl Physiol* article may not be provided. You may make a free link from the APS Journal to a web site of your choice since the article is over twelve months from its print publishing date.

The American Physiological Society publication must be credited as the source with the words "used with permission" added when referencing the *J Appl Physiol* article.

Sincerely,

Ms. Rita Scheman
Director of Publications
The American Physiological Society
