ATTENTION: George B. Ryan, Science Writer

Dear Mr. Ryan:

Thank you for your request for my paper presented at the Long Beach Spinoff Symposium in September. Unfortunately, I did not prepare a complete text and, therefore, cannot send one to you. I am, however, enclosing a copy of my notes, which I am presently putting into manuscript form, and plan to publish in the near future. It might help me to complete it to know if your publication date is flexible, or at least not immediate.

Enclosed also are two quite old papers which really were the beginning of my interest in the use of such simulation devices for rehabilitation. They may be of use for additional background information. My interest in weightlessness began in the fifties when I served as a subject in early weightlessness flight experiments, and at present the subject is more of a hobby than a vocation.

Sincerely yours,

J. G. Gaume, M.D.
