William E. Thornton

Acceptance of Finished Treadmill, Contract # NAS 9-14377

The final item on the above contract with Whitmore Enterprises has been inspected by me and not only meets but exceeds contract requirements. It is at the contractor's plant per contract modification to be used in additional development.

Mr. Whitmore has produced one of the finest devices at the lowest price I have ever seen on contract (especially for a prototype). Some degree of its quality may be appreciated from the enclosed photo, but its performance is even more outstanding. He should be commended.

It is planned to extend this contract to produce a flight version of this prototype.
