

To Dunbar

TO: FLOWN ASTROS

FROM: Bonnie Dunbar

SUBJECT: WES Review with JSC "Tiger Team"

ON Wed. 14 SEPT '83, GENE WINKLER and representatives from GE, R.I. & NASA briefed us on the status of WES anomaly assessment and redesign. In order to incorporate our experience into their final report, please take the time to complete the attached questionnaire. Only your flight number will be used as an identifier. When done, please put into the folder on my desk which will be labelled appropriately.

Your comments will be essential to understanding the problems we have experienced during flight with the WES and will hopefully aid the tiger team in a fix.

THANK

B.J.

P.S. Gene would like these by 16 SEPT if possible.

(OVER)

B.J. we (STS-8) answered these questions at the debrief.

N.B. I'm disturbed if he, they, plan any sort of corrective program based on such questions. The unit has a couple of basic flaws, always has, which are obvious if the engineers were willing to listen. So far they've been too smart & opinionated for that.

G. Thornton

Thank
B.J.
