Lt. Colonel T. A. Glasgow, USAF
Director, Office of Information
Department of the Air Force
Headquarters Aerospace Medical Div. (AFSC)
Brooks Air Force Base, Texas 78235

Dear Colonel Glasgow:

Thank you for the material on the spring/mass pendulum developed by Capt. William E. Thornton, Jr. Although the text you sent gives a good description of the operation of the device, I still need one or two more illustrations before I can go ahead with a story. Can you find an engineering print, diagram, or even a pencil sketch that clearly shows how the device operates?

I'll be looking forward to your reply.

Sincerely,

Robert Aronson
