

Grapple - easy -

Misaligned Power Conn. (180° out - done at Cape)

Need orthogonal arm -

EVA

Need integrated tag facility - Lashed up several facilities

Four hr. prebrief + no time for food, etc.

Tried to sim. inertia of suit on mid deck -

EVA tool caddies - many tethers -

* EURECA (contingency)

No constraints - Went to to check lights -

Hands get cold even w/ conduction comfort

Thermal problem not altitude -

~ 5x10² in lbs is easy

* skip lock on batts ?

CDR did not agree on EVA

EDO WCS worked well

odor on last day -

bags tilted -

Couldn't remove old bag -

Takes more compacted space -

Ergometer

Difficult to set up -

Arm ergometry -

Many pieces - 2 people ops.

SARX -

PAO is unhappy -

Many drink bag leaks (new for EDO)

& Cam Corders - 5 for 'Science' -

Fluid loading -

1 + 25 -

Feels there is 'carry over' from early loading -

P. Landing

Compromising safety & LES

Helmet Load -

Medical

4th SMS day 1 - improve c FLT - 1 vomit - shot

Cdr. didn't sleep well on day 1 - cold air

Duffy - fluid congestion - HA only

- Nancy - no 3x - p ldg - dehydrated -

Had HA day on day -

48 miles on Cape - Diuresis -

Didn't like to drink -

Fluid loaded -

p FLT. had ? urinary -
